Dear Mr. Clayton:

I am inviting your attention to the announcement with this letter of National Graduate University's 10week Technology Assessment course. I thought you might be interested in this because of the recent legislation which requires all federal agencies to file a statement of how each program undertaken might effect the environment. This course is designed especially for those who must assess the primary and secondary effects of programs in preparation for filing the necessary report with the Council on Environmental Quality.

The course in under the direction of Dr. Donald E. Cunningham who is Special Assistant to the Director of the National Science Foundation for assessment activities. He will bring to the course other experts from government as well as industry to enable class participants to have the opportunity of discussing the latest developments. The case study method will be used with students carrying out actual assessments of programs which they are involved or interested in.

If you need additional information or copies of the brochure, we will gladly furnish them.

Sincerely.

Walter E. Boek, Ph.D.

Weller Bock

President
